

HOBART rack-type dishwasher wins gold award Catering Star

Offenburg – HOBART, the world market leader for commercial warewashing technology, is the winner of the "Catering Star" gold award. Representatives of the catering industry have conferred this coveted accolade on the most recent CP/CN-series rack-type dishwasher generation. The conveyor dishwasher, with its PREMAX and PROFI models available since autumn 2017, boasts more efficiency, improved economy, easier handling, and optimised drying results. That means less staff, reduced operating costs and a long service life.

Every year, the editorial office of the leading trade magazine "Catering Inside" asks its readers to rate recently launched products in the field of food and technology. In 2018, the gold, silver and bronze prizes had to be awarded in 27 product categories. More than 300 readers – usually catering executives from restaurants, cafeterias, hospitals, etc., who know what matters most – gave their ratings.

An overview of the new features

The RACK-FLOW sensor system makes handling easy and accelerates the cleaning process. Intelligent control technology allows for loading the machine over its entire length and using it without long interruptions. Thus, you can double the number of racks which can be cleaned consecutively in one-man operation.

INFOTRONIC control helps keep track of tasks and ensures transparency. Operating mode, operating state, temperatures, water and power consumption as well as documentation of the maintenance history according to DIN standards. Efficiency is increased by 50 % owing to DYNAMIC-DRY drying which ensures first class results even under challenging conditions.
