

## **HOBART wins once again "BEST of Market"**

Offenburg – Since their introduction to the market, HOBART undercounter dishwashers have received numerous awards. Now, they won another important prize with "BEST of Market" in the "Process optimisation" category. The world market leader in commercial warewashing has already won the readers' prize a total of seven times, and for the last four years in a row.

This is primarily due to the unique TOP-DRY drying function. Thanks to this innovative technology, dishes, cutlery and glasses can be used again or put back on the shelves directly from the dishwasher, without any polishing or manual drying. This saves a lot of time and reduces the workload in every kitchen. To achieve this feat, the humid air is converted using the patented hydro-thermal energy storage system, and re-introduced into the wash chamber as hot drying air once the washing process is complete.

Sponsor and initiator of "BEST of Market" is B&L Mediengesellschaft, publisher of the trade journals GVmanager, first class, 24 Stunden Gastlichkeit, and street FOOD business. Via the online survey of January 2019, the publishing house once more called upon its readers to vote for the best suppliers among the competitors. The results for 2019 are based on 1,231 votes by representatives of the catering trade who gave their opinion based on practical experience.
